

ColdFusion & jQuery

Two Great Tastes that Go Great Together

Jeff Coughlin

www.jeffcoughlin.com

Who is this Presentation For?

- Someone looking to get into jQuery
- Anyone looking to learn some of the built-in hooks in some of CF's ajax functionality

Who Am I

- Jeff Coughlin (jeff@jeffcoughlin.com)
- Adobe Community Professional
- Certified Advanced ColdFusion Developer
- Adobe User Group Manager (Hartford CT, USA)
- Versatile Internet Solutions, LLC, owner
- Working in CF since 1999
- Network Engineer for 7 years before working in ColdFusion

Internet Solutions

Agenda - jQuery and CF

- There will be mostly demos. I don't like boring people with slides that they are forced to read.

What is jQuery?

- jQuery is a fast and concise JavaScript Library that simplifies HTML document traversing, event handling, animating, and Ajax interactions for rapid web development. jQuery is designed to change the way that you write JavaScript.
- jQuery website

The logo consists of the letters 'C' and 'F' in a white, bold, sans-serif font, centered within a dark blue square. The square has a subtle gradient and a slight reflection effect below it.

CF

Demos

It's all demos from here on :)
